SINNER

AS I AM

Who am I?

I'm not like them. I don't need anyone else to tell me who I am.
I follow my own path and make my own choices.
I am who I want to be, not who others want to see.

Exactly myself. Just as I am.

As I am does not mean being indifferent.
It just means that I'm comfortable with being different.
Comfortable with being authentic.

I don't jugde you by the way you look, act or talk.
I don't judge you by your political, sexual or religious preferences.

Cause in the end: there's a SINNER in all of us.

SINTEC® Technology

POLARIZED

SINTEC® Polarized Lenses

SINTEC® lenses eliminate reflections from flat surfaces, ensuring greater visibility and comfort. This comfortable polarized lens cuts blinding glare while filtering blue light to increase contrast and improve depth perception in a wide variety of weather/light conditions. It also has a softening effect on the eye, reducing eye strain.

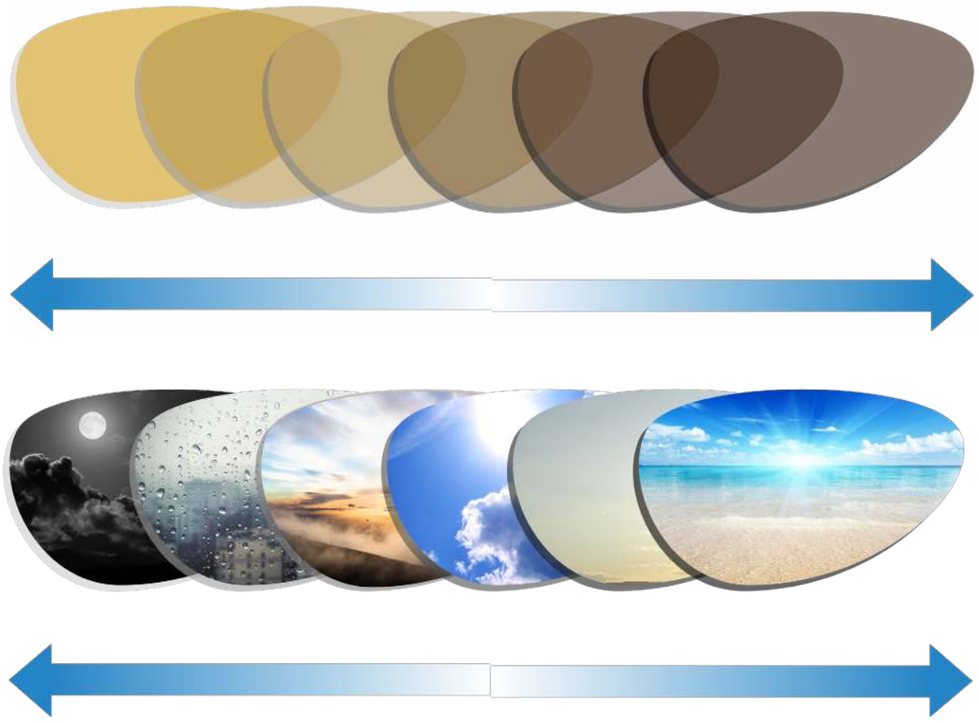
FLAT SURFACE REFLECTING LIGHT WAVES

TRANS+® Technology

PHOTOCHROMIC

The Photochromic TRANS+® Lens

The Photochromic TRANS+® lens provides rapid colour change! This high quality lens is made with the most advanced photochromic technology and the best high impact Polycarbonate synthetic material there is. It changes from CAT 1 (clear view) to CAT 3 (Dark view and vice versa. This ensures that your eyes will receive the best protection in all weather conditions.



Clearest
Provides the clearest vision, rapid clearing when you go inside with flat and low light conditions.

Darkest
TRANS+® lenses become as dark as CAT 3 sunglasses when you are exposed to the bright sunlight and provides 100% UV protection.

Fastest
Changes colour rapidly! The TRANS+® lens is one of the fastest traditional Polycarbonate Photochromic lenses.

Highest performance
The advanced Polycarbonate Photochromic lens provides the highest performance, with the best material and the fastest changing lens from orange to brown and vice versa.
