# SINNER AS I AM

**Who am I?**

**I'm not like them. I don't need anyone else to tell me who I am.  
I follow my own path and make my own choices.  
I am who I want to be, not who others want to see.**

**Exactly myself. Just as I am.**

**As I am does not mean being indifferent.  
It just means that I'm comfortable with being different.  
Comfortable with being authentic.**

**I don't judge you by the way you look, act or talk.  
I don't judge you by your political, sexual or religious preferences.**

**Cause in the end: there's a SINNER in all of us.**

## About us

# Size & Measurements

## Sizing & How to fit

- 1. In-Mold Technology**      The in-mold technology ensures that the helmet is very light in weight, ensuring maximum protection and comfort.
  - **Double In-Mold Technology**      Enhances durability and protection by fusing two layers directly to the foam liner for improved impact resistance and a lightweight design.
  - **Hardshell ABS**      The ABS (hard shell) outer shell is designed for better impact resistance and therefore provides extra safety.

---

- 2. Helmet Ventilation**      Active helmet ventilation is adjustable ventilation that you can slide open or close yourself to regulate the heat.

---

- 3. Shock Absorbing Lining**      The breathable and light lining has a shock- absorbing effect and provides extra safety and comfort.

---

- 4. Goggle Clip**      This secures the goggle strap on both sides of the helmet and when the goggle is lifted on to the top of helmet between runs.

---

- 5. Size Adjuster**      By adjusting the dial at the rear of the helmet, the fit can be optimised as desired.

---

- 6. Quick Release System**      This provides an easy to use click closure under the chin.

---

- 7. Removable Earpads**      Keep your ears nice and toasty. Our removable ear pads provide comfort and warmth on those chilly rides.

### HELMET SIZES

Wearing a proper-fitting helmet is the single most impactful thing you can do to prevent yourself from sustaining a serious injury while skiing or snowboarding. In the event of a nasty spill, or even just a minor slip up on the mountain, a helmet that is too large or too small will not adequately protect you. It's simply not worth it to risk injury because the helmet you have is a poor fit, so we are here to give you some tips on how to correctly fit a ski or snowboard helmet.

### HOW TO MEASURE?

Wrap a flexible tape measure around your head approximately one inch above the eyebrows and ears. Use this measurement to find your helmet size in the sizing chart.

### SIZING INSTRUCTION

Your helmet should fit snugly and comfortably on your head. Once straps and pads are adjusted to the proper fit, grab helmet and twist. The skin on your forehead should move with the helmet.

# Gloves & Mittens

Stay comfortable and in control with superior grip

# Gloves & technology

## Gloves vs. Mittens

Gloves, with their individual fingers, offer better dexterity than mittens and are ideal for activities where you need to frequently handle gear, adjust boot buckles and zip zippers. Lightweight gloves are a great choice for aerobic activities, such as cross-country skiing, where your body is generating lots of heat.

Mittens tend to be warmer than gloves because your fingers generate more heat when they're not separated from each other by fabric, as they are with gloves. They aren't as dexterous as gloves but they can still serve you well when you're holding ski poles, carving down the mountain on a snowboard or heading out for a hike in frigid temperatures.

## How to measure

To find out your glove size, measure (in inches) around your hand with a tape measure at the place indicated by the red line (just below the knuckles). You should use your dominant hand, the right if you are right-handed, and the left if you are left-handed.

## Dry-S® Membrane

The DRY-S® membrane blocks rain, snow and wind on the gloves external surface providing ultimate comfort.

Stops liquid moisture from penetrating, but allows perspiration vapour to escape. Keeps your skin dry and comfortable in most extreme conditions.

## SINTEC® Technology

### SINTEC® Polarised Lenses

SINTEC® lenses eliminate reflections from flat surfaces, ensuring greater visibility and comfort. This comfortable polarised lens cuts blinding glare while filtering blue light to increase contrast and improve depth perception in a wide variety of weather/light conditions. It also has a softening effect on the eye, reducing eye strain.

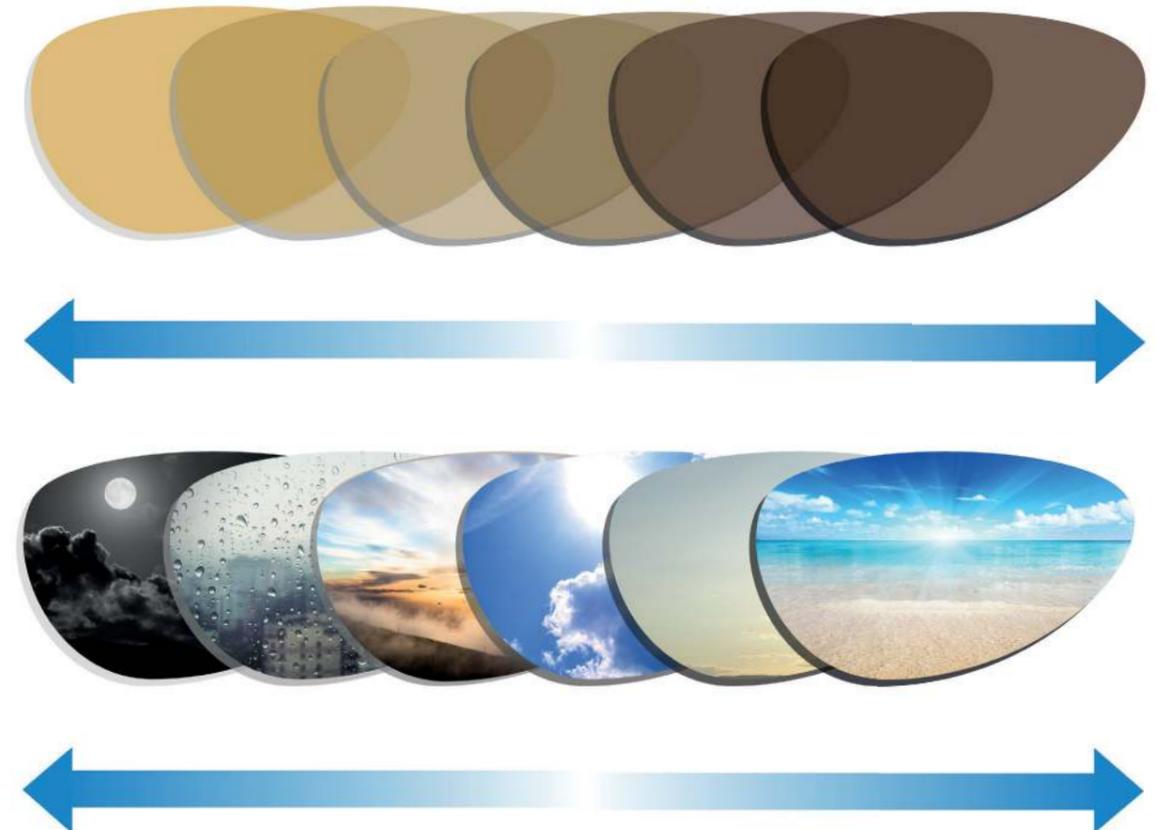

FLAT SURFACE REFLECTING LIGHT WAVES

## TRANS+® Technology

### The Photochromic TRANS+® Lens

The Photochromic TRANS+® lens provides rapid colour change! This high quality lens is made with the most advanced photochromic technology and the best high impact Polycarbonate synthetic material there is. It changes from CAT 1 (clear view) to CAT 3 (Dark view) and vice versa. This ensures that your eyes will receive the best protection in all weather conditions.

#### Clearest

Provides the clearest vision, rapid clearing when you go inside with flat and low light conditions.

#### Darkest

TRANS+® lenses become as dark as CAT 3 sunglasses when you are exposed to the bright sunlight and provides 100% UV protection.

#### Fastest

Changes colour rapidly! The TRANS+® lens is one of the fastest traditional Polycarbonate Photochromic lenses.

#### Highest performance

The advanced Polycarbonate Photochromic lens provides the highest performance, with the best material and the fastest changing lens from orange to brown and vice versa.
